

Personal Summary

Motivated biological sciences graduate with a strong academic background in biology, hands on patient care experience, and developing research skills in bioinformatics. Proven leadership in STEM educations and outreach through student organizations and community health initiatives. Eager to advance scientific understanding through graduate studies in this field.

Education

Bachelor of Science, Biological Sciences
California State University Stanislaus

Turlock, CA
December 2025

- CSU Stanislaus GPA: 3.37
- Cumulative GPA: 3.40

Relevant coursework: General Biology, Microbiology, Cellular and Molecular Biology, Immunology, Genetics, Parasitology, Bioinformatics, Genetic Biotechnology

Clinical Experience

Medical Assistant – Orthopedics

Modesto, CA

Kaiser Permanente

02–2026 to Present

- Coordinate patient scheduling and manage phone communications while processing specialty referrals, imaging orders, and follow up care in a specialty orthopedic clinic.
- Room patients, obtain and document vital signs, and prepare patients for physician evaluation and in office procedures.
- Assist during sterile in office procedures including but not limited to carpal tunnel release, trigger finger release, cyst removal, foreign body removal, and orthopedic pin removal.
- Perform clinical support tasks including suture and staple removal, wound care, and application of orthopedic braces and supports.
- Support sports medicine treatments by prepping and assisting in platelet rich plasma (PRP), whole blood, cortisone, and hyaluronic acid injections for musculoskeletal injuries.
- Maintain sterile workflow by preparing procedure trays and properly handling surgical instruments for transport to sterile processing.

Patient Care Technician – Medical Surgical

Santa Clara, CA

Kaiser Permanente

06–2023 to 02–2026

- Assist the work of Registered Nurse to ensure patient needs are met.
- Effectively and safely handles patients in the tasks of transferring, lifting, repositioning, and transporting to other units in the hospital.
- Assist with management and maintenance of medical devices including ostomy bags, NG tubes, chest tubes, JP drains, urinary catheters, rectal tubes, IV lines, sequential compression devices (SCDs), wound vacuum systems, and respiratory tubing, and assist nursing staff with wound care.

- Act as a sitter designated by Nurse Manager to ensure safety for high-risk patients.
- Obtain and record vital signs, weights, measure and document inputs/outputs.
- Aide in daily living activities such as: bathing, toileting, feeding, oral care, hair, and nail care.

Medical Assistant – Adult and Family Medicine

Escalon, CA

Oak Valley Hospital District

05–2022 to 08–2023

- Maintain and update patient charts assuring proper procedures and maintenance of medical records, accurate systems for billing, data processing, accounts payable and accurate logs for Occupational Health patient referrals.
- Assess patient vitals and prepare patients for healthcare provider by obtaining hearing and vision screenings, blood pressure, height, weight, length of newborns, and head circumference, oxygen saturation, respirations, urine samples for pre-employment screenings, and health history if indicated.
- Obtain phone/written prior authorization for treatment/diagnostic services and consultation.
- Maintain accurate appointment log for patients and follow up on missed appointments.
- Coordinate prescription refill requests while collaborating with healthcare providers.

Research & Lab Experience

Biology Teaching Assistant

08–2024 to 12–2024

California State University Stanislaus

- Under the instruction of Dr. Ritin Bhaduri Ph.D. in the Biological Sciences department.
- Aided in proctoring and grading exams and quizzes that adhere to university guidelines and restrictions.
- Assisted with lab assignments, procedures, and sorting materials for each lab activity.
- Ensured all microscopes were on, working properly, and were in focus for student viewing for the live specimens and demo slides.
- Engaged with students to ensure a cohesive learning environment, while answering questions and teaching microscope usage skills.
- Provided feedback for lab assignments and drawings to ensure efficient and complete lab productivity.

Undergraduate Research Student | Microbial Transcriptomics

09–2025 to 12–2026

California State University Stanislaus

- Advised by Dr. Tricia Van Laar Ph.D. in the Biological Sciences department.
- Analyze RNA-seq data using relevant software tools, contributing to data visualization and interpretation.
- Identify differentially expressed genes and their potential role in samples of PHB- degrading bacteria.
- Collaborate with research team to investigate gene expression patterns in microbial systems under varying conditions.

Leadership & Involvement

President | Pre-Health Society

2024–2025

California State University Stanislaus

- Chaired executive and general body meetings with clear agendas and structured planning to deliver content and lead discussions.
- Scheduled and facilitated regular officer meetings to ensure accountability and collaboration.
- Created and promoted events, emails, and workshop materials through the online university community hub.
- Led setup and coordination for events, arriving early to ensure materials and logistics were in place.
- Sent regular updates to officers and tracked events to ensure smooth operations.

Student Event Coordinator | Pre-Health Society

2023–2024

California State University Stanislaus

- Developed creative event ideas and pitched them to the executive team for approval and planning.
- Designed and presented meeting slides with the collaboration of other officers.
- Scheduled and reserved meeting/ event spaces with university Student Leadership, Engagement & Belonging department.
- Supported “Science in Our Community” events by working closely with the Faculty Director Dr. Mark Grobner and Administrative Analyst/ Specialist of this program Robert Bell.
- Reached out to guest speakers via email, social media, and professional networks to schedule club talks.

Peer Educator | Learning Commons Department

01–2023 to 08–2024

California State University Stanislaus

- Constructed a schedule to adhere to learning curriculum in identified courses such as Trigonometry, College Algebra, Statistics, Chemistry, Biology, and Spanish.
- Answered in depth student questions related to content and material in order to guide the student’s participation in their learning.
- Evaluated student performances and reflected with the usage of effective study strategies including time management, textbook reading skills, and concise note taking methods.
- Resolved technical issues with online learning resources such as Zoom and Google Meet used for distance learning.
- Monitored student progress and evaluated performance to provide structured feedback.

Science & Health Outreach

Activity Developer & Presenter – “Our Healthy Body”

February 29, 2024

STEM Outreach Event Darwin Day

California State University Stanislaus

- Constructed and organized the event/ children’s health education activity for the “Our Health Body” section as the Student Event Coordinator for the Pre-Health Society.
- Designed worksheets and mass printed documents for the population of over 500 visitors.

- Oversaw and instructed volunteers on how to take vitals and document them effectively for each child of attendance.
- Organized the structure of the activity and maintained a volunteer group of 10 students.
- Set up all supplies in an assembly line fashion whilst sanitizing machines and equipment between usage of each visitor.

Activity Manager – “Our Healthy Body”

March 15, 2025

STEM Outreach Event Science Day California State University Stanislaus

- Oversaw delivery a of children’s health education activity as the President of the Pre-Health Society for the section “Our Healthy Body” that I designed.
- Managed a team of volunteers, delegated tasks, took inventory, and delivered supplies to each station.
- Collaborated with peers to engage children in conversations about personal health and wellness.
- Served as primary point of contact for setup, logistics, and participant engagement.

Volunteer Experience

Science Day 2023 – Outdoor Volunteer

March 11, 2023

Science in our Community California State University Stanislaus

- Positioned in the Sustainable Garden of the Agriculture Center.
- Discussed and explained in depth the various vegetation grown and used for applied research in the laboratory within the Sustainable Garden.
- Guided families and visitors on tours within the Agricultural Center facilities, and distributed maps and pamphlets of the events.

Experience the Eclipse – Telescope Volunteer

October 14, 2023

Science in Our Community California State University Stanislaus

- Aided children in the viewing of the solar eclipse via large scale telescopes and solar eclipse lenses, as well as in the outdoor Observatory Dome.
- Maintained child safety and a clean organized event area within the Willow Lake.
- Aided in the set up and take down of the telescopes weighing up to 70 pounds.
- Ensured the equipment was kept clean, undamaged, and returned to their respective professor.

Junior Scientist 2024 – General Volunteer

September 14, 2024

Science in Our Community California State University Stanislaus

- Aided young students aged 9-10 years old in transferring stations from activity to activity.
- Maintained a neat and orderly classroom for students to learn and listen to each presentation.
- Kept track of student’s groups and took headcount of student’s classes.

Astronomy Night – Concession Stand Volunteer

November 8, 2024

Science in Our Community

California State University Stanislaus

- Ordered, purchased, and transported refreshments for the activities of the university.
- Organized and documented all funds to keep track of cash and online transactions (Zelle, CashApp, Venmo)
- Gathered supplies in order to serve beverages within the health and safety codes and requirements.
- Delegated tasks to volunteers in aiding with setup and sale of the refreshments.

Presentations/ Conferences

Lecture Host – Respiration and Acid Base Balance

October 4, 2024

Delhi Medical Academy of Sciences & California State University Stanislaus

- Updated and constructed to a lesson plan for an Acid Base Respiration Lab directed toward high school juniors and seniors.
- Led a lab activity for students with regards to Respiration and Acid Base Biology within the human body.
- Taught the lecture for students to be prepared and well versed for the lab activity to follow.
- Instructed and assisted students with the lab activity procedure as well as the safety tasks that are to be adhered to.

Microscopy Lab Host – “Microscopic Safari”

November 2, 2024

Delhi Medical Academy of Sciences Conference & California State University Stanislaus

- Designed and led a lab-based activity for 50+ high school students and parents to introduce microscopy and specimen observation.
- Created an original worksheet to guide student learning and reinforce biology concepts with handpicked specimen samples and slides.
- Taught students the anatomy and procedure with handling and focusing light microscopes in order to identify various biological specimens.
- Prepared and arranged all microscopes, demo slides, and specimen slide boxes in accordance to lab procedure.

Awards and Honors

- Dean’s List Fall 2021, Spring 2022, Fall 2022, Spring 2025
- NPS Success Scholarship from *Science in Our Community* – 2024

Certifications

- CPR/AED Certified for Healthcare Providers – 2025
- Medical Terminology Certification – 2020
- Certified Medical Assistant – 2021

Skills & Abilities

Bioinformatics and Computational Tools:

- MEGA
- Prokka
- BarnApp
- Clustal Omega
- SPAdes
- QIIME2
- ABySS
- QUAST
- FastANI
- NCBI databases
- BLAST

Programming and Systems:

- Linux/ Ubuntu command interface
- Python
- R (basic)
- GitHub

Laboratory Techniques:

- Microscopy
- PCR gel electrophoresis
- Spectrophotometry
- DNA extraction
- Aseptic technique
- Bacterial culturing
- Biochemical assays
- Gram staining
- Serial dilution
- Agar streaking (plate and slants)
- MIO inoculation

Clinical:

- MediTech medical systems
- EPIC medical systems
- Vital signs (blood pressure, heart rate, respiration, temperature, oxygen saturation, height, weight)
- Blood glucose monitoring
- EKG acquisition
- Foley catheter care
- Active range of motion (ROM) exercises
- Patient transferring and transport

Languages:

English and Spanish
